

REGINA RANA NABILA

FULL STACK WEB DEVELOPER | SOFTWARE ENGINEER

Yogyakarta, Indonesia | nabilaghnaaa@gmail.com |

+62 851 - 7697 - 0505 | [linkedin.com/in/regina-rana-nabila/](https://www.linkedin.com/in/regina-rana-nabila/)

PROFILE

Information Technology student at Universitas Muhammadiyah Yogyakarta with experience in web application development and UI/UX through academic projects, organizational activities, and internships. Experienced in developing front-end applications using React.js, integrating REST APIs, designing user interfaces with Figma, and building full-stack applications. Possesses strong skills in requirements analysis, problem-solving, and teamwork to develop responsive and user-friendly digital solutions.

EDUCATION

Universitas Muhammadiyah Yogyakarta | Information Technology 2023 - Present

- GPA : 3.68/4.00

SMAN 1 SIMPANG EMPAT | Natural Science 2021 - 2023

- GPA : 86,96 /100

SKILLS

- **Programming Languages** : JavaScript, PHP, Python, Java, HTML5, CSS3
- **Frameworks & Libraries** : React.js, Node.js, Express.js, Laravel, Tailwind CSS, Bootstrap
- **Databases** : MySQL, SQL Server, SQLite
- **Tools** : Git, GitHub, Docker, Postman, Figma, Visual Studio Code
- **Konsep** : REST API Integration, UI/UX Design, Responsive Web Design, Requirement Analysis, Containerization, Deployment, Agile Development
- **Soft Skills** : Leadership, Problem Solving, Communication, Teamwork, Critical Thinking, Project Management

WORK EXPERIENCE

Full Stack Developer | [Relawan Jurnal Indonesia](#) Jan 2026 - Jun 2026

- Developed a Web-Based Correspondence Management Information System to support the digitalization of organizational administrative processes.
- Developed features for incoming and outgoing correspondence management, document disposition, approval workflows, digital signatures, PDF document generation, and automated email notifications.
- Built REST APIs using Express.js, designed database structures with MySQL and Sequelize, and implemented authentication and authorization based on user access roles.
- Developed responsive user interfaces using React.js and Tailwind CSS, and integrated the frontend with the backend through REST APIs.
- Contributed throughout the entire software development lifecycle, including requirements analysis, UI/UX design, frontend and backend implementation, testing, and deployment.
- **Result**: Successfully digitized correspondence management processes, making document management, approval, distribution, and tracking faster, better documented, and more efficient than manual processes.

Front End Developer | [Professional Certification Institution \(LSP\)](#) Jan 2026 - May 2026

- Contributed to the development of a Web-Based Professional Certification Information System (LSP) to support the administration and implementation of digital competency certification processes.

- Developed user interfaces using React.js and Tailwind CSS for multiple system modules, including Admin, Independent TUK, Temporary TUK, Assessee, Examiner Assessor, and Technical Committee Assessor.
- Integrated the frontend with REST APIs using Axios to manage user data, assessment schedules, assessment documents, and certification processes in real time.
- Collaborated with the backend team to implement new features, fix bugs, conduct system testing, and enhance the application based on user requirements.
- Developed responsive and user-friendly interfaces while maintaining a consistent user experience across all system modules.
- **Result:** Contributed to the digitalization of competency certification processes, enabling the management of candidates, assessors, Assessment Centers (TUK), assessment schedules, and certification administration to become more integrated, efficient, and well-documented.

Head Front-End Developer (Project-Based) | PCM Muhammadiyah Pundong |
<https://masjidmupundong.com/>

Feb 2026 - Mei 2026

- Led the front-end development of a Web-Based Mosque Management Information System to support the digitalization of mosque administration and operations.
- Developed responsive user interfaces using React.js and Tailwind CSS with a component-based architecture to ensure a consistent user experience across different devices.
- Collaborated with the backend team to integrate the frontend with REST APIs for real-time data management.
- Coordinated directly with the client during requirement gathering, system evaluation, and feature enhancement implementation based on user requirements.
- Developed core modules, including mosque committee management, inventory, correspondence, financial management, news, events, programs, congregation management, and mosque profiles.
- Applied code review practices, developed reusable components, and maintained UI consistency throughout the front-end development process.
- **Result:** Successfully developed a system that supports the digitalization of mosque administration and operations, making data management more centralized, efficient, and easily accessible for mosque administrators.

PROJECT

Full Stack Developer | [ZeniThora Open API Tourism Destination Website](#)
| IT - UMY

Jan 2026

- Developed a tourism destination website using React.js with REST API integration.
- Built the backend using Express.js and Sequelize to manage tourism destination data.
- Developed a responsive user interface and displayed tourism destination data dynamically.
- **Result:** Made it easier for users to access tourism destination information through an integrated web-based platform.

WordPress Deployment | Docker | IT - UMY

Jun 2026

- Deployed WordPress using Docker and Docker Compose in a containerized environment.
- Installed, configured, and managed WordPress, including theme installation and customization.
- **Result:** Created a portable, consistent, and easy-to-manage WordPress environment for both development and deployment.

System Requirements Analysis | Canteen Queue System | IT - UMY

Sept 2023 - Jan 2024

- Conducted problem analysis and identified user requirements through interviews and observations.
- Prepared a Software Requirements Specification (SRS) covering the system scope, constraints, functional requirements, and non-functional requirements.
- Documented system requirements based on requirement elicitation and stakeholder analysis.
- **Result:** Produced a system requirements document that served as the foundation for developing the Canteen Queue System in a structured manner and according to user needs.

Head Front-End Developer (Project-Based)

Jun 2026

[PRELOVED LUXURY STORE](#) | IT - UMY

- Developed the frontend of the Preloved Luxury Store marketplace application using React.js and Tailwind CSS.
- Built reusable and responsive UI components while integrating the frontend with a Laravel-based REST API.

- Collaborated with the team during feature implementation, application testing, and user experience improvements.
- **Result:** Successfully developed a modern and responsive marketplace interface that supports efficient product management and transaction processes.

Full Stack Mobile & Web Application

Sept 2025 - Jun 2026

| Food Waste Management System | IT - UMY

- Developed a mobile application using Kotlin (Jetpack Compose) and a web application using React.js for a food waste management system.
- Integrated the mobile and web applications with REST APIs for real-time data management.
- Collaborated on frontend and backend development, as well as version control using Git.
- **Result:** Developed a digital platform that supports more structured food waste management and makes it easier for users to share and manage food waste information.

UI/UX Mobile Application | Himpunan Mahasiswa Islam | Prototype

Jun 2025

- Designed the mobile application user interface using Figma based on organizational and user requirements.
- Created user flows, wireframes, high-fidelity prototypes, and interactive prototypes to visualize the application's user journey.
- Collaborated with the team to refine the design based on user feedback and requirements.
- **Result:** Produced an intuitive user interface design that served as the foundation for mobile application development.

ACHIEVEMENTS

UI/UX Mobile Application | National PKM – Childent | Prototype

Jan 2025 - Jul 2025

- Designed the UI/UX of the Childent mobile application using Figma.
- Created user flows, wireframes, and high-fidelity prototypes based on user requirements.
- Collaborated with the team to design a digital solution focused on usability and user needs.
- **Result:** Produced an application prototype that served as a reference for development and supported the implementation of digital solutions in the National PKM program.

UI/UX Web Application | National GEMASTIK –

Jul 2025 - Sept 2025

Smart Library Management System (AutoLib) | Prototype

- Designed the UI/UX of the AutoLib web application using Figma.
- Developed user flows, wireframes, high-fidelity prototypes, and interactive prototypes.
- Collaborated with the team to design a digital solution for library management.
- **Result:** Produced a prototype that served as the foundation for implementing a digital library management system.

UI/UX Web Application | Techofest National UI/UX Competition 2025

Sept 2025 - Okt 2025

– La'aksa (Lapor Aksi Desa) | Prototype

- Contributed as a UI/UX Designer in the development of the La'aksa (Lapor Aksi Desa) web application.
- Conducted user research and created user flows, wireframes, high-fidelity prototypes, and interactive prototypes using Figma.
- Collaborated with the team to design a digital solution supporting village infrastructure management and community reporting.
- **Result:** Achieved Top 20 Finalist (Ranked 17th out of 66 teams) in the Techofest National UI/UX Competition 2025.

CERTIFICATIONS

- Google Advanced Data Analytics Professional Certificate — Google
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Full Stack Web Development — Dicoding Indonesia
- Career Insights in Data Analytics — Digital Talent Scholarship 2026
